Warranty*:

We hereby confirm that:

Our anti-root fabric RootBarrier®, based on a Xavan® nonwoven by DuPont, with a coating of polypropylene, is 100% impenetrable to roots.

When professionally installed in accordance with our directions the product will hold back roots for at least 25 years.

'Professional installation' includes the following:

- The product must be shielded from direct sunlight, RootBarrier® is UV-proof for no more than 3 months.
- The coating may not be damaged before or during installation. Do not fold the material, folding may cause damage.
- The tree(s) or plant(s) must be given enough space to grow in.

Should you have any doubt regarding the installation or conditions, please consult a tree expert.

Claims can only be granted, when original invoice is added.
